

# Smart Dimensions - Menu

Modified on: Fri, 12 Jun, 2020 at 10:51 AM

**Configurations** - open configurations window.

**Dimension Elements in View** - will dimension all visible elements based on selected Configuration.

**Update Dimensions in View** - will update dimensions by the configuration previously used in this View.

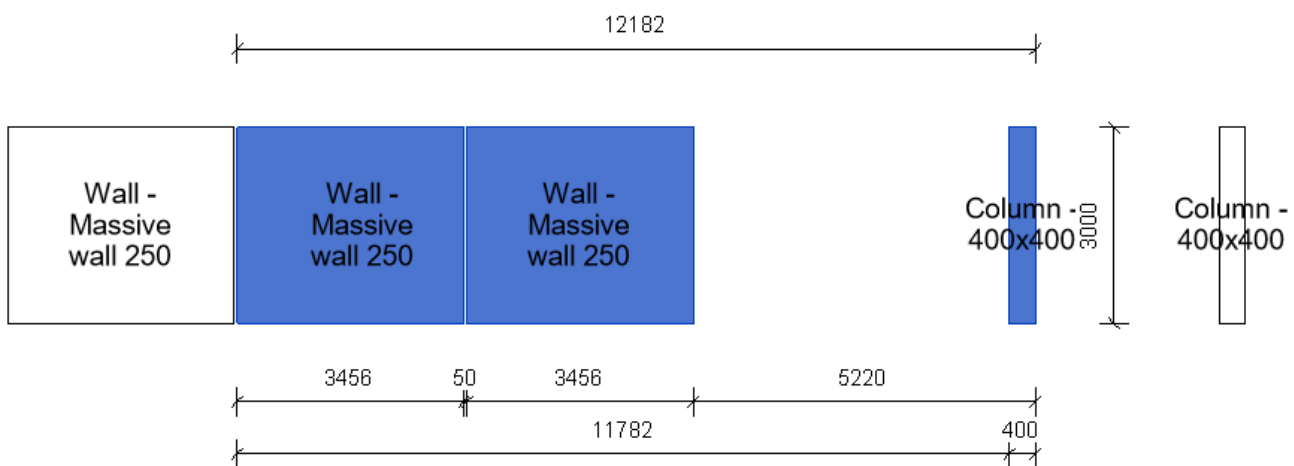

**Delete Dimensions in View** - will delete dimensions which were created with Smart Dimensions.

**Modify Dimensions** - allows you to modify dimensions in selected View by making instance changes.

**Dimension Selected Elements** - dimension only selected elements by selected Configuration.

**Update Dimensions** - update dimensions which were created with Dimension Selected Elements. You must select which one.

**Delete Dimensions** - delete dimensions which were created with Dimension Selected Elements. You must select which one.

**Dimension Element** - dimension contour of one selected element by using Dimension Configuration (command below this one)

**Dimension Configuration** - define configuration for how to dimension contour of one single selected element.

**R Configuration Settings** [ - ] [ □ ] [ X ]

<b>Horizontal Dimension</b> Total Dimension <input type="checkbox"/> Total Dimension Side: <input type="text" value="Top"/>	<b>Vertical Dimension</b> Total Dimension <input type="checkbox"/> Total Dimension Side: <input type="text" value="Right"/>
<b>Common Settings</b> First Dimension Offset: <input type="text" value="1.5"/> Dimension Type: <input type="text" value="Arrow - 2.5mm Arial"/>	<b>Openings &amp; Cuts Settings</b> Dimension Openings <input type="checkbox"/> Dimension Cuts <input type="checkbox"/> First Dimension Offset: <input type="text" value="1.5"/>

You can choose the dimension style, total dimensions placement and whether openings/cuts should be dimensioned or not.
